# 2 Release Notes

There is a release of the ISWC database software planned for Tue, 17th February @ 10AM CET.  The expected service interruption for the production release is three hours.

The purpose of this release is to introduce some new features.  It also contains miscellaneous minor bug fixes.  This release does contain a REST API change so if you integrate directly with the REST API you should consider a quick smoke test in UAT.  More details on this change are listed in section 2.4 Features below.

## 2.1. Communication

These release notes are now finalised. A copy of these release notes will be emailed to all email addresses that have an active subscription to the REST API in production as follows:
